

SUBJECT-TH1. ELECTRICAL INSTALLATION AND ESTIMATING

NAME OF FACULTY ATUL KUMAR BHANJA

MONTH	MODULE/U NIT	COURSE TO BE COVERED	TOTAL NO OF CLASSES	REF
SEMESTER fro Dt.10.03.2022 TO Dt.06.06.2022				
MARCH	UNIT-I	1. INDIAN ELECTRICITY RULES	6	
		1.1 Definitions, Ampere, Apparatus, Accessible, Bare, cable, circuit, circuit breaker, conductor voltage (low, medium, high, EH), live, dead, cut-out, conduit, system, danger, Installation, earthing system, span, volt, switch gear, etc		
		1.2 General safety precautions, rule 29, 30, 31, 32, 33, 34, 35, 36, 40, 41, 43, 44, 45, 46		
		1.3 General conditions relating to supply and use of energy rule 47, 48, 49, 50, 51, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 70		
		1.4 OH lines : Rule 74, 75, 76, 77, 78, 79, 80, 86, 87, 88, 89, 90, 91		
APRIL	UNIT-II	2. ELECTRICAL INSTALLATIONS	12	
		2. 1 Electrical installations, domestics, industrial, Wiring System, Internal distribution of Electrical Energy. Methods of wiring, systems of wiring, wire and cable, conductor materials used in cables, insulating materials mechanical protection. Types of cables used in internal wiring, multi-stranded cables, voltage grinding of cables, general specifications of cables.		
		2. 2 ACCESSORIES: Main switch and distribution boards, conduits, conduit accessories and fittings, lighting accessories and fittings, fuses, important definitions, determination of size of fuse – wire, fuse units. Earthing conductor, earthing, IS specifications regarding earthing of electrical installations, points to be earthed. Determination of size of earth wire and earth plate for domestic and industrial installations. Material required for GI pipe earthing.		
		2. 3 LIGHTING SCHEME: Aspects of good lighting services. Types of lighting schemes, design of lighting schemes, factory lighting, public lighting installations, street lighting, general rules for wiring, determination of number of points (light, fan, socket, outlets), determination of total load, determination of Number of sub-circuits.		
MAY	UNIT-III	3. INTERNAL WIRING	12	
		3. 1 Type of internal wiring, cleat wiring, CTS wiring, wooden casing capping, metal sheathed wiring, conduit wiring, their advantage and disadvantages comparison and applications.		
		3. 2 Prepare one estimate of materials required for CTS wiring for small domestic installation of one room and one verandah within 25 m ² with given light, fan & plug points.		
		3. 3 Prepare one estimate of materials required for conduit wiring for small domestic installation of one room and one verandha within 25 m ² with given light, fan & plug points.		
		3. 4 Prepare one estimate of materials required for concealed wiring for domestic installation of two rooms and one latrine, bath, kitchen & verandah within 80m ² with given light, fan & plug points.		
		3. 5 Prepare one estimate of materials required for erection of conduct wiring to a small workshop installation about 30m ² and load within 10KW.		
MAY	UNIT-IV	4. OVER HEAD INSTALLATION	12	
		4.1. Main components of overhead lines, line supports, factors Governing Height of pole, conductor materials, determination of size of conductor for overhead transmission line, cross arms, pole brackets and clamps, guys and stays, conductors configurations, spacing and brackets and clamps, guys and stays, insulators, types of insulators, lighting clearances, span lengths, overhead line devices, bird guards, beads of jumpers, jumpers, tee-offs, guarding of overhead lines.		

(Handwritten signatures)

		4.2 Prepare an estimate of materials required for LT distribution line within load of 100 KW maximum and standard spans involving calculation of the size of conductor (from conductor chart), current carrying capacity and voltage regulation consideration using ACSR.	
		4.3 Prepare an estimate of materials required for LT distribution line within load of 100 KW maximum and standard spans involving calculation of the size of conductor (from conductor chart), current carrying capacity and voltage regulation consideration using ACSR.	
		4.3. Prepare an estimate of materials required for HT distribution line (11 KV) within 2 km and load of 2000 KVA maximum and standard spans involving calculation of the size of conductor (from conductor chart), current carrying capacity and voltage regulation of the size of conductor (from conductor chart), current carrying capacity and voltage regulation consider action using ACSR.	
JUNE	UNIT-V	5. OVER HEAD SERVICE LINES	12
		5. 1 Components of service lines, service line (cables and conductors), bearer wire, lacing rod. Ariel fuse, service support, energy box and meters etc	
		5. 2 Prepare and estimate for providing single phase supply of load of 5 KW (light, fan, socket) to a single stored residential building.	
		5. 3 Prepare and estimate for providing single phase supply load of 3KW to each floor of a double stored building having separate energy meter.	
		5. 4 Prepare one estimate of materials required for service connection to a factory building with load within 15 KW using insulated wire.	
		5. 5 Prepare one estimate of materials required for service connection to a factory building with load within 15 KW using bare conductor and insulated wire combined.	
JUNE	UNIT-VI	6. ESTIMATING FOR DISTRIBUTION SUBSTATIONS	6
		6. 1 Prepare one materials estimate for following types of transformer substations	
		6.1.1 Pole mounted substation.	
		6.1.2 Plinth Mounted substation.

RENEWABLE ENERGY SYSTEMS

NO OF CLASSES/WEEK GIVEN AS PER SYLLABUS =05

DATE OF SEMESTER STARTING

DATE OF SEMESTER CLOSING

NO OF CLASSES/WEEK ALLOTTED AS PER TIME TABLE =05

TOTAL NOS. OF WORKING DAYS AS PER SCHEDULE:

Sl No.	Chapter	Name of Topic	As per Syllabus No. of classes allotted	As per plan No. of classes required to complete	Detail Content of this chapter
1	1	Introduction to Renewable energy	5	5	1.1. Environmental consequences of fossil fuel use. 1.2. Importance of renewable sources of energy. 1.3. Sustainable Design and development. 1.4. Types of RE sources. 1.5. Limitations of RE sources. 1.6. Present Indian and international energy scenario of conventional and RE sources
2	2	Solar Energy:	15	15	2.1. Solar photovoltaic system-Operating principle 2.2.1. Cell, module, array, Series and parallel connections. Maximum power point tracking (MPPT). 2.3. Classification of energy Sources. 2.4. Extra-terrestrial and terrestrial Radiation. 2.5. Azimuth angle, Zenith angle, Hour angle, Irradiance, Solar constant. 2.6. Solar collectors, Types and performance characteristics, 2.7. Applications: Photovoltaic - battery charger, domestic lighting, street lighting, water pumping, solar cooker, Solar Pond
3	3	Wind Energy:	12	12	3.1. Introduction to Wind energy. 3.2. Wind energy conversion. 3.3. Types of wind turbines 3.4. Aerodynamics of wind rotors. 3.5. Wind turbine control systems; conversion to electrical power:

					<p>3.6. Induction and synchronous generators.</p> <p>3.7. Grid connected and self excited induction generator operation.</p> <p>3.8. Constant voltage and constant frequency generation with power electronic control.</p> <p>3.9. Single and double output systems.</p> <p>3.10. Characteristics of wind power plant.</p>
4	4	Biomass Power:	12	12	<p>4.1. Energy from Biomass.</p> <p>4.2. Biomass as Renewable Energy Source</p> <p>4.3. Types of Biomass Fuels - Solid, Liquid and Gas.</p> <p>4.4. Combustion and fermentation.</p> <p>4.5. Anaerobic digestion.</p> <p>4.6. Types of biogas digester.</p> <p>4.7. Wood gasifier.</p> <p>4.8. Pyrolysis.</p> <p>4.9. Applications: Bio gas, Bio diesel</p>
5	5	Other Energy Sources	16	12	<p>5.1. Tidal Energy: Energy from the tides, Barrage and Non Barrage Tidal power systems.</p> <p>5.2. Ocean Thermal Energy Conversion (OTEC).</p> <p>5.3. Geothermal Energy – Classification.</p> <p>5.4. Hybrid Energy Systems.</p> <p>5.5. Need for Hybrid Systems.</p> <p>5.6. Diesel-PV, Wind-PV, Microhydel-PV.</p> <p>5.7. Electric and hybrid electric vehicles.</p>
